## Development Framework

### Celebrate the Sense of Arrival

A westward expansion of buildings to Black Mountain Road will welcome students, faculty/staff, and visitors into campus and provide a community connection through the proposed Performing Arts Center.

### Strengthen the Southern Connection

Limiting access to emergency use only across a portion of Miramar College Driveway allows for a stronger connection between the north and south edges, reinforced further by a pedestrian path.

### Unify the Pedestrian Connections

A clear organization of pedestrian paths allows for the opportunity to establish Compass Point as a destination by which visitors can orient themselves on campus, serving as a link between the Multicultural Center & Welcome Center.
