Page in Program  
Mapper**

# Update Course Sequences in Program Mapper

the course sequences will need to be reviewed and edited annually.

- Who will make sure the course sequences are reviewed?
- Who will review them?
- Where will edits go?
- Who will input the edits and change the course sequences in Program Mapper

# Other Colleges

After the cleanup process, which will likely last approximately 2 years, the average maintenance time is less than 20 hours a semester. However, the amount of time and workload will depend on the review process that is developed and which office is charged with enforcing that the process is upheld. The College will need to develop a long-term maintenance plan.

Some colleges have continued to offer a reassigned position at .20 for the long-term maintenance. This person is responsible for coordinating the updating process, collecting revisions, and inputting revisions.

One college, who has been using the program mapper for 4 years, has the maintenance within the curriculum committee. They share curriculum changes along with the course sequences. Then the chair, who has reassigned time, inputs the changes into the program mapper.

Another college is planning for the Vice President of Instruction's office to coordinate the review and input the changes.

# Update Program Page in Program Mapper

the program pages will need to be reviewed and edited annually. Program pages will have the description, a video or photo, the PLO's and the maps.

- Who will make sure the review of this page (per major) is done?
- Who will review the major page?
- Where will edits go?
- Who will input the edits and change the major page in Program Mapper
