SOCIAL DETERMINANTS OF EDUCATIONAL SUCCESS

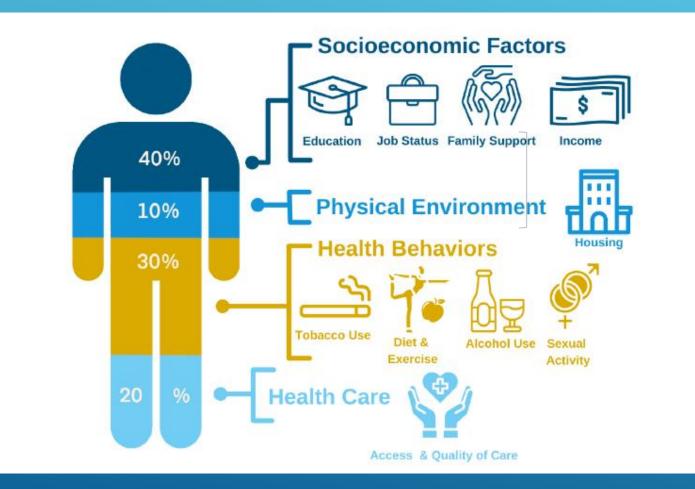

IDEA WAS DISCUSSED AT THE OCTOBER 2021 BOARD OF GOVERNOR'S LEARNING SESSION

BASED ON THE IDEA OF SOCIAL DETERMINATES WHICH CAME OUT OF HEALTH CARE

THE SOCIAL DETERMINANTS OF HEALTH (SDOH) MODEL WAS PUBLISHED IN 2008

SDOH EXPLAINS THAT CERTAIN SOCIAL FACTORS CAN HAVE THE SAME OR EVEN GREATER IMPACTS THAN HEALTHY CHOICES AND QUALITY HEALTH CARE. Access & Quality Healthcare only contributes 20% to whether a person is healthy or not

STUDENT'S INTELLECTUAL ABILITY IS NOT NECESSARILY THE BEST OR ONLY PREDICATOR OF EDUCATIONAL SUCCESS

Social Determinants that Impact Educational Success

Socioeconomic Factors

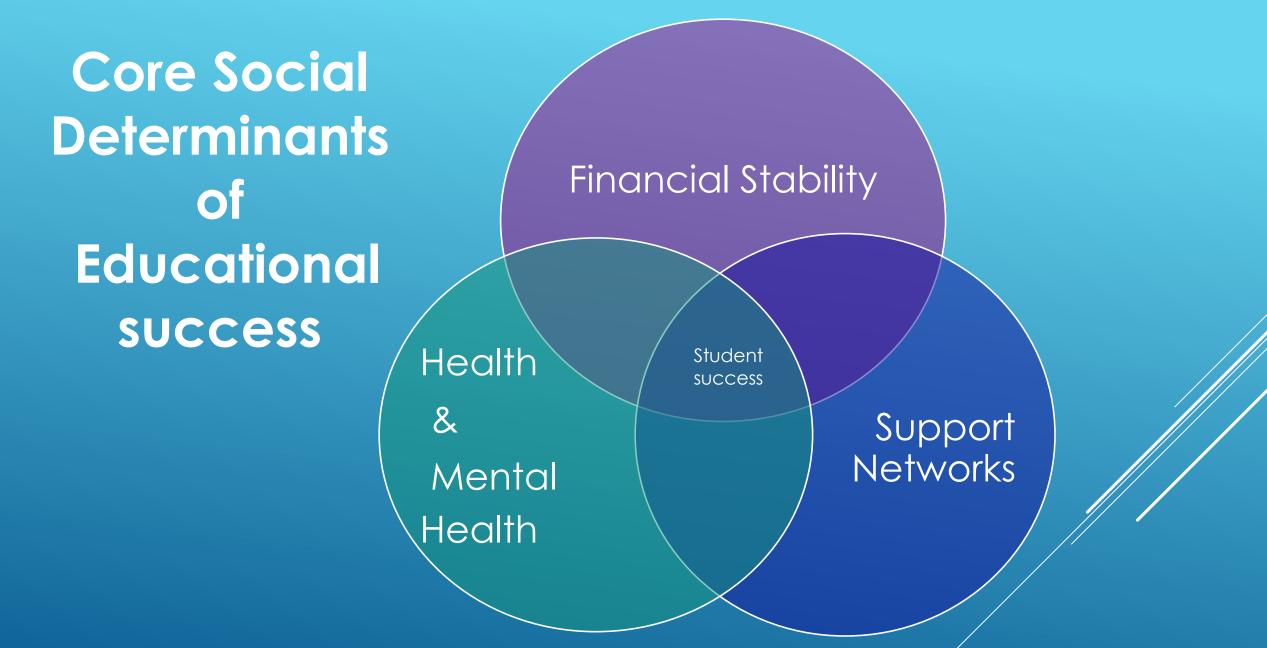

Physical Environment

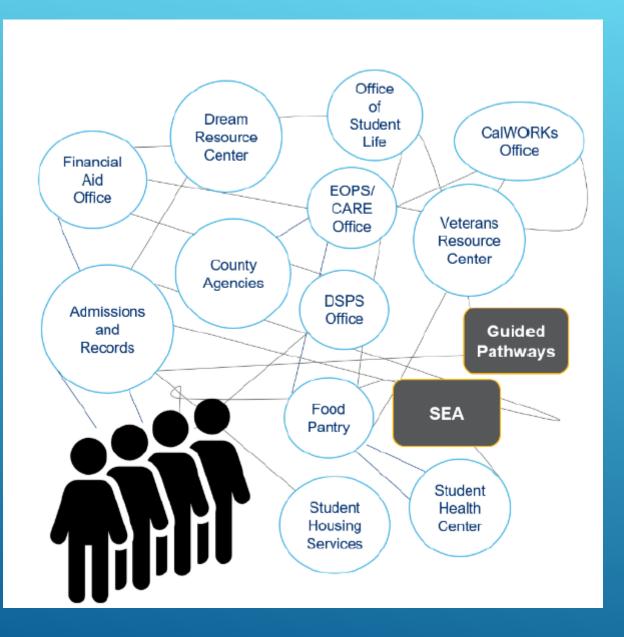

Health Factors

THE CHANCELLOR'S OFFICE IS ASKING THAT WE REFRAME HOW WE DO THINGS

THE MESSY REALITY OF THE STUDENT EXPERIENCE

- Intake forms
- Eligibility Requirements
- Applications
- Verifications
- Available Services

We need to Shift Structures so that we create an ecosystem that is:

- Student Focused
- Clarifies Problems
- Removes Barriers to Services
- Increase access to successful
 interventions

An example is the recent charge for a comprehensive Basic Needs Center
