Good afternoon,

We are excited to inform you that District IT Services has officially kicked off an ERP Single Sign-on (SSO) project to be implemented Fall 2025. As this project will affect all students, faculty and staff, we are starting a communication campaign to get the word out early to reach as many groups and users as possible. We are informing you as senate and employee unit representatives so that you are aware as we begin district wide communications. Below are a few details to note thus far.

- This project is being completed for compliance purposes and ease of access.
- The project core team and extended subject matter experts (SME) team has been formed with representatives from Educational Services, Fiscal Services, Human Resources, IT Services and includes students and faculty.
- The go-live date, October 10-12, 2025, was selected after reviewing timelines across Educational Services, Fiscal Services and Human Resources.
- We will be working closely with the District Marketing, Communications and Public Affairs office, campus Communications offices, a team of students, and consultant, Vernon Crawford, for a comprehensive communications and training strategy.

If you have any questions or concerns regarding the SSO project, please email me, Antoine Andari and Vernon Crawford. Stay tuned for more information. Thank you for your support.

Respectfully,

Annette De Lozier (she, hers, her)
