

SSSP-SEP-BSI-BSSOT-CTE-SEM Integration Agenda 10/31/16

State Chancellor's Memo will serve as the basis of discussion regarding a few key points as follows:

- 1) Across our system, many districts and colleges are well into this integration process, using a variety of approaches to create an integrated, cohesive experience that supports our students on their way to completion.
 - a. **College Response:** Student Success Framework for Long-term Integration Planning (Focus on the operation plans as a starting point of our efforts)
- 2) The suspension of SSSP, SEP, and BSI Action and Expenditure Plans for 2016-17 has freed up administrative capacity and staff-time at districts and colleges. We encourage you to use this time to engage in local discussion and planning about program integration and coordination related to the three programs.
 - a. **College Response:** Purpose of meeting
- 3) For those looking for a place to begin, here are some suggestions on specific activities and processes to help your college prepare for program integration:
 - a. Review programs and services across the entire lifecycle of students, from recruitment to completion, and identify gaps and barriers.
 - i. **College Response:** Data to Inform Decision-making column from our planning framework
 1. Qualitative Data Packet (Use this piece as reminder that we have been doing this as a college and we have a wealth of information at our finger tips)
 2. Overall Quantitative Trends and Integration Purpose (Use this as main discussion point-it includes SPAS info)
 - b. Develop a "crosswalk" of services and activities supported by SSSP, SEP, and BSI to identify areas in which efforts are occurring in similar or related areas.
 - i. **College Response:** Show "crosswalk" in efforts to demonstrate how initiatives are related (Participants to take this with them to read and digest information)
 - c. Hold joint meetings of SSSP, SEP, and BSI steering committees to improve integrated planning.
 - i. **College Response:** Discussion on potential taskforce for the integration efforts
