

Spring 2021 Biology 136 Quality and Regulatory Practices in Biotechnology

This course is an introduction to basic quality principles and tools with an emphasis on their application in biotechnology. Topics include quality control, quality assurance, validation, documentation, and regulatory compliance within the biotechnology industry. The course prepares students for the Certified Quality Improvement Associate (CQIA) examination through the American Society for Quality. It is intended for future or current biotechnology technicians.

This course will prepare students for the CQIA exam with content based knowledge in quality practices for the industry. More information on this certification is found here: <https://asq.org/cert/quality-improvement-associate>. The CQIA exam is not part of the course.

Class begins on February 1st, 2021. To enroll:

- 1. Go to www.sdmiramar.edu***
- 2. Enroll in the college (if you are not a student)***
- 3. Enroll in Biology 136 through mySDCCD during your registration time or during open enrollment beginning December 14th, 2020.***
